To Proficiency and Beyond*

WBES Cares

Because several employees of Jones County Schools have Bertie County connections—and because Bertie County students understand what flood victims are going through—our school district has “adopted” Jones County Schools and will collect much needed supplies FOR their students, FROM our students. These donations we collect will not be filtered through the Red Cross or FEMA or any other relief agency. They will go directly from our students TO their students. At least two of their schools are devastated and at least 40 students are without homes. Let's show our Panther Pride and extend a helpful hand. You can drop off or send all donations from now until November 2nd.
